

PSET Repository ReadMe*

Anish Krishna Lakkapragada

This is the documentation for using this PSET repository responsibly. I host my LaTeX'd PSET solution files (1) as an education resource for friends at other universities, fellow Yale University students, and all those interested and (2) for quick reference when solving problems. These PSET solutions are not to be used irresponsibly; only look at the solution after giving each problem an honest attempt. **IF YOU USE THESE PSETS TO CHEAT, YOU ARE NOT ONLY STUPID BUT YOU ARE CHEATING YOURSELF OUT OF THE ABILITY TO FALL IN LOVE WITH MATH.** Furthermore, I am not smarter than you and my solutions did not always get a perfect score.

To access the (one-indexed) `N`th assigned PSET of a Yale course with course number `CODE` is:

`https://anish.lakkapragada.com/notes/TYPE-CODE/psets/N.pdf`

where `TYPE` is `stats` or `math`. To access my solution for this PSET you can go to:

`https://anish.lakkapragada.com/notes/TYPE-CODE/sols/N.pdf`

These hosted problem and associated solution PDFs are synchronized daily at 4:20AM with my computer files through a Cronjob Shell Script. If you want to contribute any corrections, please email `anish.lakkapragada@yale.edu`.

*Note that PDF here is referring to Portable Document Format, not to be confused with the veritable Probability Density Function.
